40				0.08														
41																		
42				* = Snow														
43																		
44																		

= This change resulted due to the top of the measurement bulkheads being modified to make them at same height/elevation. The bulkheads have also been leveled. River flow remained constant before and after the change.

= (gauge reading - .03) per S. Blumer on 9/22/06
